- Express
- Redux

RECENT PROJECTS

Govinda's Restaurant
July 2023 - Present
Live Site - **GitHub**

This is an e-commerce website built with Node.js, Express.js, PostgreSQL, Bcrypt, React, Redux, Styled Components. It allows users to purchase food, gift-cards and administrators to create accounts, securely purchase items, and admins to post the daily menu on twitter.

Cocktail party Web Application
April 11 - 2023
Live Site - **GitHub**

In summary, this project focuses on creating an attractive and responsive user interface using HTML and CSS. Essential JavaScript concepts are also employed to add interactivity, communicate with servers, and manipulate JSON data from APIs. Forms are used to make calls to two APIs, the DOM is manipulated, and state management is handled using LocalStorage.

INTERESTS

Learning new technologies:

I am interested in expanding my knowledge in Three.js and exploring the creation of 3D models using techniques like Spline.

Playing soccer:

I am passionate about soccer/football and enjoy playing it in my free time.

Exploring interaction with UI/UX:

I am passionate about exploring and participating in the design of user interfaces (UI) and user experience (UX).

WORK EXPERIENCE

Govinda's Vegetarian Cuisine

06/07/2016 to 07/25/2023
(Houston, Texas)

MANAGER

Tasks performed: I specialized in sales order management, contacting clients to handle extensive orders and ensure their satisfaction. I was also involved in updating the website and the Square store, as well as developing sales strategies and coordinating employees.
